The Grass Valley Edius 6 software includes more than 2,000 effects and 1,000 effects and transitions presets to create beautiful, professional-grade transitions in a fluid workflow. There are many creative post processing options in this program including monochrome adjustments, an emulsion toolbox, frame-based color adjustments and a timeline. Timecode allows you to seamlessly create timelines from audio and video clips and provides access to a range of data properties such as frame and timecode frame values.

This application is an essential tool for creating stunning, pixel-perfect transitions and effects such as fades, dissolves, cross dissolve transitions, and scale transitions. This application facilitates the access, composition, interpretation, archiving and management of the contents via cloud. It is possible to

work with material from any location over WiFi, 4G or cellular network on any browser. It can also load downsized or quality-reduced versions of the original content, allowing viewers to access the content in a variety of ways, including through a mobile browser.

Grass Valley Edius Pro 7 is the first product in the Edius family to support the 802.11ax WiFi standard. Grass Valley Edius Pro 7 is the first in the Edius family to support the 802.11ax WiFi standard. This standard enhances the speed of 802.11ac connections and delivers approximately 8 times the bandwidth of 802.11ac while maintaining similar battery life. This is achieved by using a higher-rate channel and more efficient MIMO (multiple input multiple output) technology.
