It's not only powerful, but also easy to use. With flexiSIGN & PRINT, you can create professional quality output on your desktop. You can easily create and sign documents with a minimum of fuss using either a laser or inkjet based printer. You can print off or download to PDF and use them as traditional printed documents. Raster and vector files and original files are possible with the wide format files when printed. FlexiSIGN is a cross-platform and international software that will help professional signmakers deliver quality graphic work using a wide format printer and cutter. FlexiSIGN-PRO is designed to help professional signmakers deliver quality graphic work using a wide format printer and cutter. FlexiSIGN includes user-friendly tools, such as vectorization, true shape nesting, color trapping, masking, workspace profiles and more. The program also supports seamless print and cut design, output and ripping. Standard file formats can be imported and exported to be used in other design and publishing software. FlexiSIGN-PRO allows you to load custom fonts to use on your signs and banners. As FlexiSIGN has taken off, we have come to realize that there are some issues with the version 10.5 in relation to the wide-format printer and cutter software that we have been using. We are therefore producing this product under the name FlexiSIGN PRO V10.5.1, to identify it as the new software and to not fall under the original version. 5ec8ef588b
